# Documentation for Upload History Page

The page is divided in two section:

1. For Sell: All the books which the user has currently uploaded for sale.
2. Sold: All those uploaded books which are already sold out.

When the user will hover on the page Name of the Book and its rating will be displayed:

On image hover cursor will change to pointer type. On clicking the image a modal will open having all the details of the book and an edit and a delete button. To edit the details or to delete the post.

When you hover on the cross button its css changes.

When you will click on the update button it will redirect you to book upload page.
